AIRMAIL

Dr. Stig Veibel
Chemical Laboratory of the University
Copenhagen, Denmark

Dear Dr. Veibel:

We are engaged in a study of the genetic control of the specificities of bacterial galactosidase. Your papers on the galactosidase of yeast and of seeds would be very helpful to us. I would be especially obliged to receive reprints if available of your earlier papers on the theoretical aspects of enzyme substrate and enzyme inhibitor analysis.

Yours with many thanks,

Sincerely,

Joshua Lederberg
Asst. Prof. of Genetics
